

Wood River Refinery Tour

By

Jeff Bond

June 2 - 10:30-12:00 or thereabouts, we will be visiting one automotive icon (Shell/Wood River Refinery Museum) with our own icon from GM Pontiac. The refinery originally started in 1917 as Wood River Refining and is now a Phillips 66 refinery. It is currently co-owned by Cenovus Energy based in Canada. The refinery is celebrating 100 years of operation. We will be able to walk through museum and associated buildings, then go to another Wood River Illinois icon, King Louie's Drive-in. I suggest the King Louie w/cheese, potato planks and a large "home-made" root beer (like the old days, yummy). Should be an interesting adventure and good eats!

Museum Address:

Adjacent to the Refinery on Highway 111 in Wood River Illinois
